

The figure displays four histograms, each representing the distribution of 'age' for a specific class. The x-axis for all plots is 'age' (0-100), and the y-axis is frequency (0-100). The classes are: BTO, Commercial, HA, and plaque\_in.

- class: BTO:** Shows a very low frequency distribution with a small peak around age 80.
- class: Commercial:** Shows a low frequency distribution with a small peak around age 80.
- class: HA:** Shows a low frequency distribution with a small peak around age 80.
- class: plaque\_in:** Shows a high frequency distribution with a prominent peak around age 80.

class: Commercial

class: plaque\_inoculum
