

Figure 1 displays four histograms showing the distribution of the number of voxels per bin for different classes. The x-axis represents the number of voxels per bin (0 to 100), and the y-axis represents the number of voxels (0 to 100). The classes are: class: BTO, class: Commercial, class: HA, and class: plaque_in. The BTO class shows a peak at 100 voxels. The Commercial class shows a peak at 50 voxels. The HA class shows a peak at 100 voxels. The plaque_in class shows a peak at 100 voxels.

class: Commercial

class: plaque_inoculum
